Plot

The film is set in a not-too-distant future where Earth has been ravaged by pollution and overpopulation. The only remaining plant life is contained in a series of massive greenhouses orbiting the Earth. These greenhouses are operated by a team of scientists, led by Freeman Lowell (Bruce Dern). Lowell is a dedicated environmentalist who believes that the plants are the key to saving humanity.

However, the mining corporation Vallon Industries sees the plants as a potential source of profit. The company's CEO, Earl Talbot (Cliff Potts), orders his team to destroy the greenhouses and harvest the plants. Lowell and his team refuse to allow this, and they flee the greenhouses with the plants in tow.

The scientists travel to Saturn, where they hope to find a new home for the plants. However, Vallon Industries sends a team of assassins to stop them. The scientists are outnumbered and outgunned, and they are forced to make a desperate stand. In the end, the scientists are killed, but they succeed in saving the plants.
